

This breadcrumber machine is specially made for bakeries, but suitable also for restaurants and communities, to recover stale bread.

- It is in stainless steel and anodized aluminium
- It can be easily disassembled for deep cleaning.
- Very high power, that assures a high production per hour and a silent functioning.
- Extremely easy to operate: once started you only need to put the dry bread into the filler to grate it fine and homogeneous.

The simple operation of this breadcrumber machine guarantees an unlimited use with no need of maintenance.
